TRANSMISSION OF MATERIALS IN THIS RELEASE IS EMBARGOED UNTIL  
**8:30 A.M. (Eastern) Thursday, July 24, 2014**

## UNEMPLOYMENT INSURANCE WEEKLY CLAIMS

### SEASONALLY ADJUSTED DATA

In the week ending July 19, the advance figure for seasonally adjusted **initial claims** was 284,000, a decrease of 19,000 from the previous week's revised level. This is the lowest level for initial claims since February 18, 2006 when they were 283,000. The previous week's level was revised up by 1,000 from 302,000 to 303,000. The 4-week moving average was 302,000, a decrease of 7,250 from the previous week's revised average. This is the lowest level for this average since May 19, 2007 when it was 302,000. The previous week's average was revised up by 250 from 309,000 to 309,250.

There were no special factors impacting this week's initial claims.

The advance seasonally adjusted **insured unemployment rate** was 1.9 percent for the week ending July 12, unchanged from the previous week's unrevised rate. The advance number for seasonally adjusted **insured unemployment** during the week ending July 12 was 2,500,000, a decrease of 8,000 from the previous week's revised level. This is the lowest level for insured unemployment since June 16, 2007 when it was 2,453,000. The previous week's level was revised up 1,000 from 2,507,000 to 2,508,000. The 4-week moving average was 2,542,250, a decrease of 17,000 from the previous week's revised average. This is the lowest level for this average since October 13, 2007 when it was 2,527,500. The previous week's average was revised up by 250 from 2,559,000 to 2,559,250.

## UNADJUSTED DATA

The advance number of actual initial claims under state programs, unadjusted, totaled 292,344 in the week ending July 19, a decrease of 78,215 (or -21.1 percent) from the previous week. The seasonal factors had expected a decrease of 58,477 (or -15.8 percent) from the previous week. There were 340,457 initial claims in the comparable week in 2013.

The advance unadjusted insured unemployment rate was 1.9 percent during the week ending July 12, unchanged from the prior week. The advance unadjusted number for persons claiming UI benefits in state programs totaled 2,554,739, a decrease of 3,326 (or -0.1 percent) from the preceding week. The seasonal factors had expected an increase of 5,016 (or 0.2 percent) from the previous week. A year earlier the rate was 2.3 percent and the volume was 3,047,517.

The total number of people claiming benefits in all programs for the week ending July 5 was 2,611,871, an increase of 165,383 from the previous week. There were 4,842,653 persons claiming benefits in all programs in the comparable week in 2013.

No state was triggered "on" the Extended Benefits program during the week ending July 5.

Initial claims for UI benefits filed by former Federal civilian employees totaled 1,833 in the week ending July 12, a decrease of 701 from the prior week. There were 1,847 initial claims filed by newly discharged veterans, an increase of 126 from the preceding week.

There were 12,884 former Federal civilian employees claiming UI benefits for the week ending July 5, an increase of 1,079 from the previous week. Newly discharged veterans claiming benefits totaled 23,509, an increase of 387 from the prior week.

The highest insured unemployment rates in the week ending July 5 were in Puerto Rico (4.0), New Jersey (3.4), Alaska (3.2), Connecticut (3.2), Pennsylvania (2.9), California (2.8), Nevada (2.7), Rhode Island (2.7), Massachusetts (2.6), Virgin Islands (2.4), Illinois (2.3), and New York (2.3).

The largest increases in initial claims for the week ending July 12 were in New York (+14,427), California (+11,126), Georgia (+6,112), Texas (+5,147), and Indiana (+4,748), while the largest decreases were in Michigan (-6,846), New Jersey (-5,886), Kentucky (-1,673), Ohio (-1,552), and Massachusetts (-1,259).

Figures Appearing In columns showing Over-The-Week Changes reflect all revisions in data for prior week submitted by State agencies.

1. The Unemployment Compensation program for Federal Employees (UCFE) and the Unemployment Compensation for Ex-servicemembers (UCX) exclude claims filed jointly under other programs to avoid duplication.
2. Rate is not seasonally adjusted. The source of US total covered employment is BLS.

## TECHNICAL NOTES

This news release presents the weekly unemployment insurance (UI) claims reported by each state's unemployment insurance program offices. These claims may be used for monitoring workload volume, assessing state program operations and for assessing labor market conditions. States initially report claims directly taken by the state liable for the benefit payments, regardless of where the claimant who filed the claim resided. These are the basis for the advance initial claims and continued claims reported each week. These data come from ETA 538, Advance Weekly Initial and Continued Claims Report. The following week initial claims and continued claims are revised based on a second reporting by states that reflect the claimants by state of residence. These data come from the ETA 539, Weekly Claims and Extended Benefits Trigger Data Report.

### A. Initial Claims

An initial claim is a claim filed by an unemployed individual after a separation from an employer. The claimant requests a determination of basic eligibility for the UI program. When an initial claim is filed with a state, certain programmatic activities take place and these result in activity counts including the count of initial claims.

The count of U.S. initial claims for unemployment insurance is a leading economic indicator because it is an indication of emerging labor market conditions in the country. However, these are weekly administrative data which are difficult to seasonally adjust, making the series subject to some volatility.

### B. Continued Weeks Claimed

A person who has already filed an initial claim and who has experienced a week of unemployment then files a continued claim to claim benefits for that week of unemployment. Continued claims are also referred to as insured unemployment.

The count of U.S. continued weeks claimed is also a good indicator of labor market conditions. Continued claims reflect the current number of insured unemployed workers filing for UI benefits in the nation. While continued claims are not a leading indicator (they roughly coincide with economic cycles at their peaks and lag at cycle troughs), they provide confirming evidence of the direction of the U.S. economy.

### C. Seasonal Adjustments and Annual Revisions

Over the course of a year, the weekly changes in the levels of initial claims and continued claims undergo regularly occurring fluctuations. These fluctuations may result from seasonal changes in weather, major holidays, the opening and closing of schools, or other similar events. Because these seasonal events follow a more or less regular pattern each year, their influence on the level of a series can be tempered by adjusting for regular seasonal variation. These adjustments make trend and cycle developments easier to spot.

At the beginning of each calendar year, the Bureau of Labor Statistics provides the Employment and Training Administration (ETA) with a set of seasonal factors to apply to the unadjusted data during that year.

Concurrent with the implementation and release of the new seasonal factors, ETA incorporates revisions to the UI claims historical series caused by updates to the unadjusted data.
