This document is prepared for general reference and may not reflect all the details of a State's law. Consult the State agency or the State law for authoritative information. More detailed information is in the *Comparison of State Unemployment Insurance Laws*, which also includes a chapter on Temporary Disability Insurance Programs. Current and earlier publications of both these documents can be found at <http://www.ows.doleta.gov/unemploy/statelaws.asp>.

#### KEY:

Avg – Average	AAW - Average Annual Wage	AWW - Average Weekly Wage	BP - Base Period
BPW - Base Period Wages	CQ - Calendar Quarter	CY - Calendar Year	Dep – Dependent
DA - Dependents Allowance	HQ - High Quarter	HQW - High Quarter Wages	InAvg - Industry Average
MBA - Maximum Benefit Amount	WBA - Weekly Benefit Amount	"=" - Equal To	">" - Greater Than
"≥" - Greater Than or Equal To	"≤" - Less Than or Equal To	"%" – Percent	"+" – Plus
Qtrs – Quarters	"x" – Times		

#### OTHER PROVISIONS OF LAW:

**Waiting Week** – Most States require a 1-week waiting period where the claimant must meet all eligibility conditions before benefits are payable. The following States do not require a waiting week: CT, GA, IA, MD, MI, NV, NJ, and WY. The waiting week may be paid after a specified period of unemployment in KY, MO, TN, and TX. In some States, it may be suspended under certain conditions.

**Base Periods** – Almost all qualifying earnings are determined using a BP consisting of the first 4 of the last 5 completed CQs. A few States use a different BP. In the following States, more recent earnings may be used in an alternative BP under certain conditions: AK, AR, CA, CO, CT, DE, DC, GA, HI, ID, IL, IA, ME, MD, MA, MI, MN, MT, NE, NV, NH, NJ, NM, NY, NC, OH, OK, OR, PR, RI, SC, SD, UT, VT, VA, VI, WA, WV, and WI. TN has a BP for persons receiving workers' compensation.

#### FOOTNOTES:

<sup>1</sup> Reflects basic qualifying formula. Some States have alternative qualifying formulas.

<sup>2</sup> When 2 amounts given, higher includes DA; the higher figure for both the min and max WBAs includes DA for the max # of deps. If State has a DA and only one amount is given, the max is the same with or without the allowance. The total amount of DA payable in any week is limited by a cap. CO and MN do not pay DA. The lower amount is based on HQWs, and the higher amount is based on total BPWs. For NY, if BP HQWs are > \$3,575, WBA will not be < \$143. For KS, if the 3-month seasonally adjusted avg < 4.5%, max benefit weeks is 16; if the 3-month seasonally adjusted avg is at least 4.5% but < 6%, max benefit weeks is 20; and if the 3-month seasonally adjusted avg is at least 6.0%, max benefit weeks is 26. For ME, WBA changes on June 1<sup>st</sup> each year based on prior calendar year's AWW.

<sup>3</sup> This column lists the amount of weekly earnings that are disregarded (will not reduce the WBA). However, earnings in excess of those listed will be deducted from the WBA, resulting in a reduced payment. For WA, ½ of wages over \$5, if receiving training benefits.

<sup>4</sup> For States that use earnings, further calculation is needed to derive the # of benefit weeks--take the amount obtained from the formula listed (which is the claimant's MBA) and divide it by the claimant's WBA. States with uniform duration do not have to calculate the # of benefit weeks since it is fixed at 26 weeks. In MO, when calculating 1/3 BPW, BPW are limited to 26 x WBA for each quarter. In PA, for initial claims effective on and after 1/4/15, a credit week equals 16 x PA Minimum Hourly Wage Act of 1968, or at least \$116, for CY 2015.

<sup>5</sup> Lists # of benefit weeks for only the regular program for total unemployment. In States with uniform duration, all eligible claimants receive the same # of benefit weeks (in IL the max amount payable cannot exceed one's BPW, resulting in some claimants being paid less than 26 weeks). For FL the # of benefit weeks is 12 if the avg UI rate is ≤ 5% and increases by 1 week for each ½% increment in the avg UI rate above 5%. The # of benefit weeks is limited up to a max of 23 weeks if the avg UI rate is ≥ 10.5%. For GA, max # of weeks is determined semi-annually using the avg UI rate in April and Oct. When the avg UI rate is 6.5% or lower, max # of UI weeks will be 14 and increases by 1 week for each ½% increment increase above 6.5%. The max # of UI weeks cannot be above 20 when the avg UI rate ≥ 9.0%. When MA is paying extended benefits and/or emergency unemployment compensation, the max # of weeks of regular benefits is 26. For WI, with some limited exceptions, individuals with significant ownership interest in family partnerships, LLCs and corporations,

and certain of their family members, their benefit entitlement is limited to 10 x the individuals' benefit rate, which typically amounts to 4 weeks of regular UI benefits. In some States, additional weeks of benefits are payable under limited circumstances such as high unemployment, continuation of approved training, or workforce dislocations.

<sup>6</sup> Coverage is determined by the size of the employing unit's payroll or the # of days or weeks worked during a CY and applies to employing units who, during any CQ in the current or immediately preceding CY, paid wages of \$1,500 or more, or to employing units who employ one or more workers on at least 1 day in each of 20 weeks during the current or immediately preceding CY; such employing units are liable for taxes, and the workers accrue benefit rights. For those States with "Any size," all workers are covered regardless of payroll size or weeks worked. States may have different thresholds for agricultural, domestic, and nonprofit employing units.

<sup>7</sup> Rates apply only to experience rated employers and do not include applicable non UI taxes, surtaxes, penalties, or surcharges. In most States, rate year 2015 begins on Jan 1, 2015, and ends on Dec 31, 2015. In NH, NJ, TN, and VT rate year 2015 begins on July 1, 2015, and ends on June 30, 2016. All tax rates for 2015 are initially posted in the July issue. In AR (there is an additional assessment of 2.0% for employers having a deficit rate for 2 years; 4.0% for 3-4 years; 6.0% for 5-6 years; and 8.0% for 7 or more years). In CO experience-rated employers pay an additional 0.2520 of base premium rate for bond principal repayment. For ME there is an additional 0.06% for the Competitive Skills Scholarship Fund on all employer rates. Rates for IL include the fund building surcharge. For MI, an obligation assessment is calculated for each experience rate and is added to each employer's rate. NM max rate is 5.4%, but NM assesses an excess claim rate to accounts that exceed 5.4%, not to exceed 1.0% raising the max rate to 6.4% for 2015.

<sup>8</sup> New employer rate shown is the base rate. Higher rates may apply depending on industry classification and/or other factors: DE (construction employers pay an avg industry rate), DC, IL (5.25% construction employers, 4.65% manufacturing, & 4.75% mining which includes the fund building surcharge), IN (1.60% new governmental employers), IA (8.0% new construction employers and 1.0% new nonconstruction employers), KS (6.0% construction employers), KY (foreign & domestic construction firms receive maximum rate), MD (foreign contractors assigned avg industry rate, and in 2014 new construction employers headquartered in another state pay a 10.5% avg industry rate); MA (9.49% new construction employers), ME (predetermined yield), MI (construction employers receive industry rate), MN (high experience rated industry new employers are assigned a rate of 9.10% plus base rate, assessments, and fees), MT, MO (greater of 3.51% or InAvg; new construction employers pay 4.92%), NE (1.39% new nonconstruction industry employers & 5.40% new construction industry employers not eligible for experience rating), NJ, NM (starting in 2015, new contributing employers will have a rate that is the greater of their industry average UI contribution rate or 1.0%. Industry classifications for contributory, experienced employers are used to determine the avg industry rates of new employers. Based on the NAICS code for the establishment, this is the employer's assigned industry rate which remains in effect until 2 years as an experience rate employer is acquired.) NY (highest rate assigned to employers with positive account balances or 3.4%, whichever is less), ND (1.07% new positive-balance nonconstruction employers and 6.10% new negative-balance nonconstruction employers), OH (7.2% new construction employers), PA (10.19% new construction employers), RI (new employers pay an additional 0.21% Job Development Fund), SD (6.0% construction employers), TN (new nongovernmental employers in an industry grouping with a negative reserve ratio are assigned the premium rate for that industry grouping; construction 7.0%; sect 33 mfg. 5.5%; mining 5.0%), TX, UT (construction employers pay max rate, all others pay InAvg%), VT (construction employers pay InAvg), WA (min/max rates include social cost tax, 90% of InAvg), WV (8.5% new out-of-state construction employers), WI (6.6% new construction employers with payrolls both over and under \$500,000, 4.1% new employers with payrolls of \$500,000 and over and 3.6% with payrolls under \$500,000), and WY (InAvg, but not less than 1.0%).
